What is an ERP?

An Enterprise Resource Planning system is a comprehensive solution that helps your organization to standardize and manage business functions and streamline operations with a centralized database and a user-friendly interface which contributes to improving collaboration between departments.

What makes ScholaSoftware solution better than others?

The ScholaSoftware system was developed for the education sector with an application intended for schools of any size. The ScholaSoftware solution is therefore perfectly suited to the management of school activities and has already demonstrated its effectiveness.

Key advantages of ScholaSoftware solution:

- ✓ User friendly
- ✓ Intuitive operating mode
- ✓ Ease and rapid deployment
- ✓ Permanent online access via any web browser
- ✓ Easy monitoring of activities with the dashboard tool
- ✓ Online approval of quotes, invoices, receipts and purchase orders
- ✓ Paperless concept thanks to digital storage of documents and information

Hosting: Dedicated server

- ✓ Storage: 1TB SSD + 2TB SATA
- ✓ Memory: 64 GB
- ✓ CPU Core: 4

*Server colocation solution is available based on a tailored quotation.
